

Program Arrangement of MiTA2025

The keynotes and oral presentation will be held **both onsite and online** via VooV (Tencent) Meeting.

****Beijing time**

Onsite Venue: Palazzo Settembrini 49, Naples, Italy.

May 20, 2025 Tuesday	
MiTA2025 May 20 Opening Ceremony https://meeting.tencent.com/dm/hOuAAe5XAp4n #Meeting ID: 846-318-655	
15:00-15:15	Opening Talk by General Chair, Prof. Yunliang Jiang, Zhejiang Normal University
15:15-16:00	Keynote #1 Neural Dynamics Optimization and Its Applications
16:05-16:50	Keynote #2 Fuzzy Systems and Fuzzy Sets
May 21, 2025 Wednesday	
Oral Presentation #1 https://meeting.tencent.com/dm/9sdFJVoBI1NQ #Meeting ID: 848-162-673	
14:30-14:45	Similar Segment Learning Multitask Optimization based on Locally Sensitive Hashing
14:45-15:00	Personalized Cluster-Based Model Adaptation for Non-IID Federated Systems
15:00-15:15	Maximum Profit Heuristic Algorithm for Earth Observation Satellites Scheduling Problem
15:15-15:30	C2CNet: Connect to Casual Feature Pyramid Net for Target Detection
15:30-15:45	A Hybrid Deep Learning Method for Skin Retouching
15:45-16:00	AntOptNet: Leveraging Adaptive Optimization and Feature Selection for Low-Resolution Image Classification
16:00-16:15	Improper Gaussian Signaling Based Robust Transmission Design for RIS-Assisted Communication Systems
16:15-16:30	A Multi-Population Genetic Algorithm for Multi-Objective Multi-Agile Satellite Task Scheduling
16:30-16:45	Strong-Guided Pixel Supervised Contrast for Polyp Segmentation
16:45-17:00	Multi-output Neural Network-Assisted Differential Evolution for Optimization Problems with Expensive Objective Function and Inequalities
May 22, 2025 Thursday	
Oral Presentation #2 https://meeting.tencent.com/dm/9kjqHk9ICzQn #Meeting ID: 900-874-900	
14:30-14:45	Multivalued Weight Neural Networks: Quantization-aware Training for Deep Network Compression
14:45-15:00	A Lightweight Deep Network for Video Summarization via Submodular Maximization
15:00-15:15	Generative Agent Model for Simulating Interdisciplinary Communication
15:15-15:30	An Improved Set-based Particle Swarm Optimization for Solving the Multiple Traveling Salesmen Problem
15:30-15:45	Pheromone Mutation-Based Ant Colony Optimization for Multiple Traveling Salesman Problem
15:45-16:00	Unveiling Risk Evolution Mechanisms Driven by Deepfake Technologies

16:00-16:15	Hyper-Heuristic Realtime Flows Guided Traffic Flow Assignment Algorithm
16:15-16:30	A Hybrid Evolutionary Algorithm for Production Process Optimization
16:30-16:45	Adaptive Bias Estimation Multitask Optimization
16:45-17:00	Area Ratio-Based Box Counting Algorithm for Intelligent Inventory in Stacked Goods Environments
May 23, 2025 Friday	
Oral Presentation #3 https://meeting.tencent.com/dm/fYueirMEuQ4R #Meeting ID: 591-617-919	
14:30-14:45	A Level-based Learning Differential Evolution for Multitask Optimization
14:45-15:00	Large-scale Dynamic Adaptive Traffic Lights Scheduling Algorithm based on Genetic Programming
15:00-15:15	Multitask Optimization Based on Distribution Matching
15:15-15:30	Hidden Emotions: Country-Based Fuzzy Logic Emotion Detection Method on Twitter Text
15:30-15:45	Adaptive Dimensional Learning for Multitask Optimization
15:45-16:00	Cross-Platform Aesthetic Analysis: A Computer Vision Study of REDnote and Instagram
16:00-16:15	Fuzzy System Multitask Optimization based on Mixture Strategy
